

Doctoral School of the Polytechnic of Bari (Academic Year 2019/20)

1. Theories and Methods of the Project for the Territory, 3 CFU, SSD: ICAR/21.

Syllabus:

The course is divided into 2 steps, corresponding to the 2 blocks of lessons and exercises.

The first step (20 hours, 2 ECTS) will be structured in 4 thematic sections: the first will deal with general questions on the main approaches to the contemporary territories regarding a discipline that is found between the epistemological model of scientific disciplines and that of Social Sciences; the other 3 lessons will focus on the topics that are at the heart of the contemporary disciplinary debate (as well as in the PhD course in "Project for Heritage: Knowledge and Innovation"), relating to the relationship between "City and Landscape" and "Architecture and Heritage".

The second step (10 hours, 1 ECTS) will be dedicated to exercises and seminars of teachers external to the course: the first will be conducted in the form of a workshop on sample territories on which to experiment an approach to contemporary issues (relationship between places and communities, territories palimpsest, territories in crisis...), developing a synthetic written-graphic report concerning the main topics of the course. A seminar held by an Italian or foreign external personality, with a relevant point of view on the topics of the course, will allow a wide reflection between PhD students and author on the topics covered.
